

Amendments to the Specification

Page 2, line 28 to page 3, line 20, please rewrite as follows:

That is, the invention relates to:

- (1) a color interlayer film for laminated glass, comprising a resin composition containing a polyvinyl acetal resin, a coloring agent, and an infrared ray shielding agent, characterized in that the resin composition further contains a phosphoric acid ester compound at a ratio of 5 parts by weight or less to 100 parts by weight of the polyvinyl acetal resin;
- (2) the color interlayer film for laminated glass according to the above (1), wherein the phosphoric acid ester compound is a trialkyl phosphate, a trialkoxyalkyl phosphate, a ~~triallyl~~ triaryl phosphate, or an alkyl-~~allyl~~ aryl phosphate;
- (3) the color interlayer film for laminated glass according to the above (1), wherein the phosphoric acid ester compound is trioctyl phosphate, triisopropyl phosphate, tributoxyethyl phosphate, tricresyl phosphate, or isodecylphenyl phosphate;
- (4) the color interlayer film for laminated glass according to any one of the above (1) to (3), wherein the content of the phosphoric acid ester compound is 0.001 to 5 parts by weight to 100 parts by weight of the polyvinyl acetal resin; and
- (5) a laminated glass, characterized in that the color interlayer film for laminated glass according to any one of the above (1) to (4) intervenes between at least one pair of glass plates.

Page 4, lines 13-24, please rewrite as follows:

The phosphoric acid ester compound to be used in the invention may include, for example, a trialkyl phosphate, a trialkoxyalkyl phosphate, a ~~triallyl~~ triaryl phosphate, and an alkyl-~~allyl~~ aryl phosphate, and here, "alkyl" means an alkyl group having 1 to 12 carbon atoms and "aryl" means an aromatic hydrocarbon group optionally substituted with a substituent (e.g. a phenyl group optionally substituted with a substituent such as a lower alkyl having 1 to 4 carbon atoms and a lower alkoxy having 1 to 4 carbon atoms). More specific examples of the above-mentioned phosphoric acid ester compound are trioctyl phosphate, triisopropyl phosphate, tributoxyethyl phosphate, tricresyl phosphate, and isodecylphenyl phosphate.
